CAMPING MUST-HAVES

Compiled by Mark Samuel

BUG-FREE BREAK

If you're planning a trip to a malaria area, you need to take every precaution against being bitten by mosquitoes. In fact, no matter where you are, keeping the bugs that bite and sting at bay can only make your holiday more enjoyable. Vital Protection is a textile impregnation treatment that offers long-term repellent action against insects like mosquitoes, midges, bedbugs, sandflies and fleas – all the nasties whose sole purpose is to spoil a memorable vacation. In addition, it inhibits odour-causing bacteria in fabric, without causing damage to the clothes. It's completely safe and non-toxic for the environment.

Look out for it in Outdoor Warehouse, selected Campworld stores and Cape Union Mart. Further info is available at www.vitalprotection.co.za.

R99.95 (80 ml)
R199.95 (200 ml)
R600 (1 litre)

MAPS TO MOVE YOU

The Slingsby Maps series has been completely overhauled this year with the latest updates, info and GPS co-ordinates. Because of their clear and attractive presentation, these maps are easy to use and particularly useful for hikers, cyclists, tourists, fishermen and even those in aviation. Some of the top-selling maps cover the Table Mountain National Park, the Garden Route and the Overberg Whale Coast – all ideal destinations for your next caravanning trip.

The maps are available at leading bookshops, sports stores, tourism bureaus and certain accommodation establishments. Find out more at www.themaps.co.za.
